### Just-in-Time Access

- Break-glass and emergency access
- On-call and pre-approved conditional policies
- Automated provisioning
- Time-bound deprovisioning

### Next-Gen Identity Governance

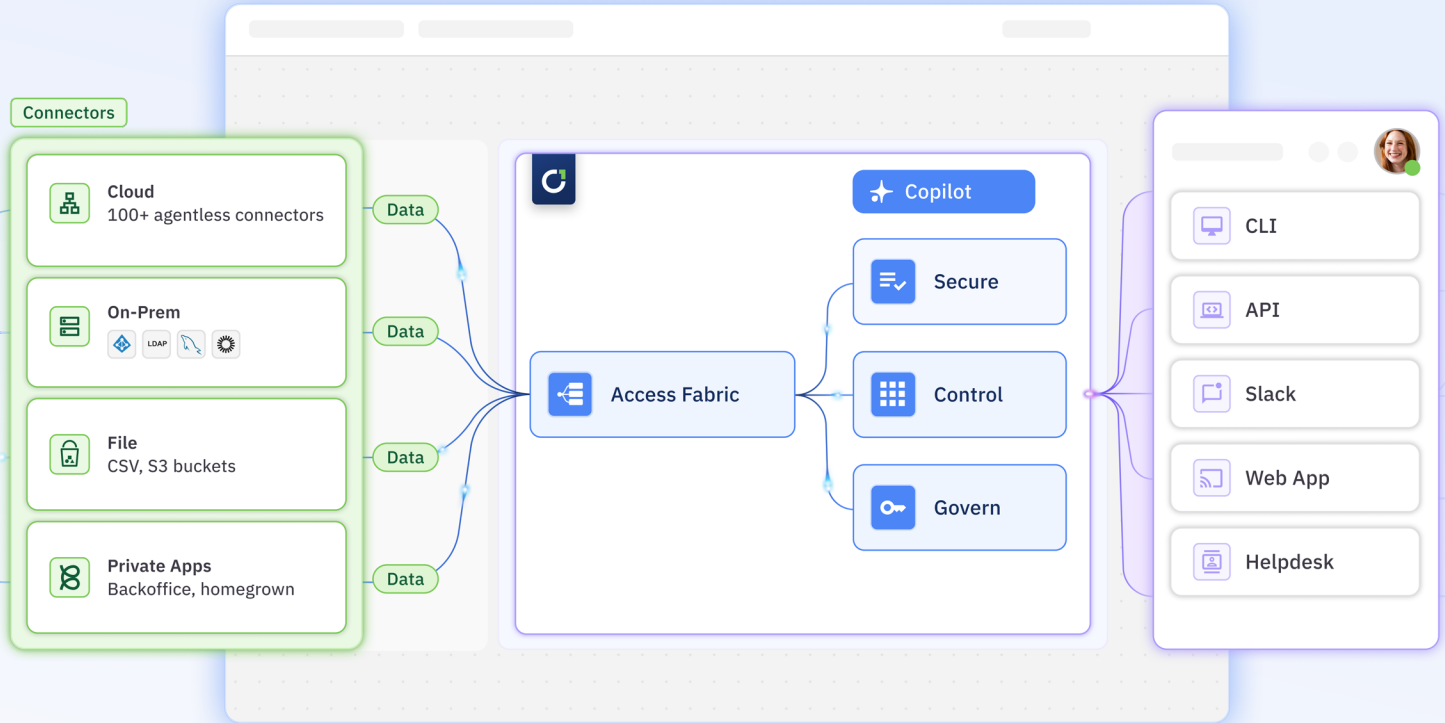

- Automated reviews with AI-powered risk insights
- Self-service app directory
- Automated onboarding and offboarding
- Separation of duties conflicts detection

### Zero Standing Privileges

- Real-time detection of shadow IT
- Usage-based revocation
- Orphaned, high-risk, and over-privileged account remediation

# How ConductorOne works

Centralize, view, and activate your identity and access data.

“We’re able to minimize the number of users with access to critical systems at a given time. That’s a big security win for us across the board.”

**Paul Yoo**  
Head of Security Assurance at **ramp**

**1**

month average time to go live

**97%**

less time to process access requests

**95%**

less time to prepare access reviews
